Core Elements

- Renewable Expansion
- Grid Upgrade & Interconnection
- Efficiency

Transformational Elements

- Power Market Reforms
- Smart Flexibility Solutions (storage, balancing services)

Net-Zero Integrated Energy System

- End use electrification (e.g., transport, heating, cooling)
- Beyond Electrification (e.g., hydrogen, CO2 solutions)

Increasing Digitization, stakeholder collaboration & system efficiency across solutions

Connected Customer

- Increasing Digitization, stakeholder collaboration & system efficiency across solutions
